Kadawatha, Sri Lanka

PROFILE SUMMARY

Software Engineering professional with one year of internship experience at Mobitel (Pvt) Ltd, contributing to enterprise-level full-stack applications. Skilled in Java, Spring Boot, React.js, RESTful APIs, and relational database integration. Experienced in developing web applications, implementing backend services, and building AI-integrated software solutions. Passionate about problem-solving, continuous learning, and developing reliable, scalable applications as an Associate Software Engineer.

SKILLS

P**rogramming Languages:** Java, JavaScript, TypeScript, Python
Frontend Development: React.js, React Native, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend Development: Spring Boot, Node.js, RESTful API Development
Databases: MySQL, Oracle, Informix, MongoDB
ORM & Security: Hibernate, Spring Data JPA, Spring Security, JWT
AI & Computer Vision: PyTorch, FastAPI, OpenCV, NumPy
Tools & Technologies: Git, GitHub, GitLab, Bitbucket, Postman, Docker, MQTT, WebSocket
Operating Systems: Windows, Linux

WORK EXPERIENCE

Intern Software Engineer | Mobitel (Pvt) Ltd

- Gained 1 year of hands-on experience in professional software development.
- Contributed to enterprise-level software development projects using React.js, Java, and Spring Boot.
- Developed frontend components and backend REST APIs to support business workflows and application functionality.
- Integrated relational databases, including MySQL and Informix, to support data retrieval, processing, and persistence.
- Collaborated with development team members to implement features, debug issues, and maintain application quality.
- Gained practical experience in version control, API integration, software testing, and the software development lifecycle.

EDUCATION

BSc (Hons) Computer Science (Software Engineering)
University of Wolverhampton, UK | CINEC Campus, Sri Lanka
2026–2027 | Currently Reading

Higher Diploma in Software Engineering
Institute of Software Engineering (IJSE)
2023–2025 | GPA: 3.864

PROJECTS

Industry Projects
Mobitel (Pvt) Ltd – Intern Software Engineer | 2025 – 2026

APN Approval Portal
Tech stack: React.js, Spring Boot, REST APIs, MySQL, Informix, Bitbucket

- Developed a multi-module enterprise portal using React.js and Spring Boot for APN creation, approval, status tracking, reporting, and termination.
- Integrated REST APIs with MySQL and Informix to support multi-level approval workflows and business operations.

mDass Module
Tech stack: React.js, Spring Boot, REST APIs, Informix, Oracle, Bitbucket

- Developed full-stack features using React.js and Spring Boot, including Account Status, NIC Validation, Location Update, Retention Period, and Transaction Reports.
- Developed REST APIs and database integrations, including transaction details and PDF report generation.

Call Centre IVR Modernization – API Development
Tech stack: Java, Spring Boot, REST APIs, Informix, JSON

- Developed Spring Boot REST APIs to support customer, subscriber, service, account, call, and billing information retrieval.
- Integrated APIs with Informix and implemented JSON-based data exchange for IVR system integration.

Personal Projects

Smart Crop Protection System Against Animal Intrusion
Tech stack: Python, FastAPI, PyTorch, OpenCV, Java 21, Spring Boot, Spring Security, JWT, MySQL, React.js, TypeScript, Tailwind CSS, MQTT, WebSocket, Arduino

- Fine-tuned an AI model using a custom dataset of 2,500 annotated images to detect birds, cows, elephants, monkeys, and wild boars, achieving 85.24% accuracy on a held-out test set.
- Implemented zone-aware animal detection using OpenCV to classify detections based on their position relative to protected crop areas and support early warnings.
- Developed a full-stack monitoring platform using React.js, TypeScript, Spring Boot, and MySQL, with real-time alerts, camera and zone management, and detection history.
- Integrated Arduino serial communication and MQTT to trigger automated deterrent responses based on detected animal species.

Car Rental Management System
Tech stack: React.js, TypeScript, Tailwind CSS, Spring Boot, Spring Security, JWT, Hibernate, JPA, MySQL, Axios

- Developed a full-stack car rental platform covering car inventory, customer details, bookings, and payments, with a public rental website and a POS admin interface.
- Built secure Spring Boot REST APIs with Spring Security and JWT for authentication and role-based access, using Hibernate/JPA for MySQL persistence.
- Created responsive React.js and TypeScript frontends styled with Tailwind CSS, integrated via Axios for real-time CRUD operations on cars, bookings, and customers.
